GB

**) Siren and flashlight can be held-off by a positive or negative voltage, unless otherwise selected by cutting J4-J7.

F

**) La sirène et le flash peuvent être déclenchés avec une tension positive ou négative, sauf en sac de programmation selective en coupant le pontage J4-J7.

NL

**) Sirene en flitslicht kunnen worden gestart door verwijderen van een positief of negatief houdspanning. Programmering wordt gedaan door middel van draadbruggen J4-J7.

D

**) Die Sirene und Blitzlampe kann wahlweise mit einer positiven oder negativen Haltespannung angesteuert werden. Die Programmierung erfolgt über die Brücken J4-J7.

I

**) La sirena ed il lampeggiante possono essere controllati sia da un positivo che da un negativo. Il comando può anche essere programmato selettivamente agendo sui cavallotti J4-J7.

E

**) La sirena y el flash pueden ser activados por una tensión positiva o negativa. A menos que se seleccione contando los puentes J4-J7.

ADJUST TAMPERSWITCH SPRING

CLOSE YOUR SIREN
